

HORTICULTURAL

Internships and Training in Ireland

We are very pleased to announce that we now have exciting new horticultural placements available for students who are looking for internships in Ireland in these fields.

We now have **3 new Irish nurseries** and 2 great garden centres working with WHITE.

These companies are perfect for forestry, landscaping, agricultural, or horticulture internships.

2 of the nurseries specialize in Trees and 1 of them has self-catering accommodations that can house up to 13 people. The garden centre placements are seasonal placements (April-October).

Our Program has 3 Main Objectives:

1. Language Skills: Our goal is to help international candidates to improve their English language knowledge and work related language skills; this will help them in their subsequent studies and professional life.

2. Professional Skills: The Candidate will have the opportunity to learn more about Irish horticulture. They will acquire valuable work experience in the chosen career and gain confidence in their ability to function in an English-speaking environment. This will enhance the candidate's career prospects by obtaining certificates that describe his/her English ability and his/her work experience. They will be in a significantly better position to find a job or improve promotion prospects in an increasingly competitive market.

3. Cultural Knowledge: The Candidate will get to know Irish people both at work and socially. The participants of these programs will have the possibility to learn more about the Irish culture and the Irish way of life, sharing the every-day life and customs of Ireland. We want our candidates go home with a comprehensive understanding of the Irish way of life

Please feel free to contact us for more information on these exciting opportunities.
