

Breve CV de los conferenciantes

- ✓ Joel Kronfeld, Emeritus Professor of Geosciences, Tel Aviv U., is a geochemist. He received his Ph.D. from Rice University, and has served for extended periods as an Adjunct Professor at Dalhousie University and as a visiting scientist at the C.S.I.R. (Quaternary Dating Research Unit), Pretoria. He is currently studying carbon isotopes in the gaseous, liquid and solid phases of the unsaturated zone in semi-arid regions. He has 82 peer reviewed scientific publications and has presented over 100 conference papers.

- ✓ Murray Moinester, Emeritus Professor of Physics, Tel Aviv U., received his Ph.D. from the University of Rochester in 1968, and then joined the faculty at Tel Aviv University. He served as guest professor for extended periods at many leading universities and accelerator laboratories, has extensive experience in experimental and computational methods, carried out many research programs in high energy particle and nuclear physics, published some 200 scientific papers in refereed journals, and authored some 75 conference papers. Since retirement, he works in the fields of particle physics, archaeology via infrared imaging & scientific dating, environmental radioactivity, soil science, and climate engineering. <http://www-nuclear.tau.ac.il/~murraym>
